John R. Kasich, Governor Tracy J. Plouck, Director

In the beginning..... ATR was granted to Ohio

- ❖ This allowed for the idea of Recovery Support Services outside primary treatment
- Variety of services made available for the support of individuals in recovery
- ❖ Housing was the main one identified as biggest need to sustain recovery
- State Departments were still separate agencies but engaged in BRSS TAC Policy academy to create a unified definition of recovery.

MOVNG OHIO FORWARD.....

TRANSITIONING TO A
RECOVERY-ORIENTED SYSTEM OF CARE.....

"By focusing on recovery supports that are local and personcentered, we can build a service network that finally tears down the service silos and includes the gamut of helpful community resources to meet the needs of peers"

-Jack Cameron -Past Director

Ohio Empowerment Coalition

The CASE FOR CHANGE

Ohio's movement to a (ROSC), represents a shift away from crisis-oriented, acute-care treatment to a recovery management approach that provides long-term supports with the recognition that there are many pathways to healing and recovery.

Ohio made the decision to overhaul their entire county-based mental health and addiction system to a Recovery-Oriented System of Care - Ohio's **Alcohol, Drug Addiction and Mental Health (ADAMH) Boards**, in partnership with individuals in recovery and local stakeholders, are transforming local services and supports to fit within the recovery paradigm.

CHANGING THE CONVERSATION

Recovery Is Beautiful - is a movement providing hope and encouragement while changing the conversation in regards to addiction and mental illness.

ADAMH Boards are helping to reduce the stigma of and discrimination against addiction and mental illness by ensuring that people understand that these are chronic illnesses and that -

Treatment Works - People Recover

Recovery is to be *CELEBRATED* – individuals in recovery become active, productive, contributing members of their communities!

DEVELOPMENT OF RECOVERY IS BEAUTIFUL

Recovery is Beautiful BluePrint, a five-year plan to transition Ohio's local community mental health and addiction service systems into Recovery-Oriented Systems of Care (ROSC).

This Blueprint is a framework where Ohio Boards are the Recovery-Oriented System of Care "hub" for their local communities.

There is coordination across systems to ensure that local entities are prepared to offer community-based mental health and addiction services, and recovery supports that are person-centered to meet the needs of individuals working toward recovery.

REDOVERY Is Beautiful."

The Implementation Committee, in conjunction with input from Lonnetta Albright, Executive Director of the Great Lake Addiction Treatment Transfer Center (GLATTC), Dr. Ijeoma Achara, and Dr. Arthur Evans developed the Recovery-Oriented System of Care (ROSC) Self-Assessment.

This assessment determine community strengths and areas of opportunities within ROSC. This self-assessment process, adopted from multiple national ROSC assessments, focused on the domains of Ohio's Recovery Is Beautiful BluePrint.

After completion, focus group convened with individuals in recovery, family members and stakeholders to stimulate conversation about the findings.

ROSC COMMUNITY REPORTS

After the completion of the ROSC self-assessment and focus groups, each of the ADAMH Boards developed a community report that was disseminated to community partners highlighting the findings of the ROSC self-assessment and focus group discussions.

ROSC: A LAKE COUNTY ADAMHS BOARD REPORT TO THE COMMUNITY

Overview

ROSC (Recovery Oriented System of Care) is a way
of thinking about service delivery for those with mental
litness and/or addiction disorders that focuses first and
foremost on clients and family members.

 ROSC emphasizes the importance of peer supports, employment supports, housing, and transportation. It calls for services that are culturally appropriate, and delivered in an accountable, effective, and efficient manner.

 ROSC recognizes that local management of behavioral health services is vital.

•The Lake County ADAMHS Board is one of eight ROSC "pilot" boards in Ohio.

Objective: "Change the conversation"

Mental illnesses and addiction disorders are chronic illnesses.
 Mental illnesses and addiction disorders can be successfully treated.

·Recovery is worth celebrating.

The Process

An internal Lake ADAMHS team was engaged to develop and implement a plan relative to a state-structured survey to assess our compliance with our ROSC principles:

Focusing on clients and families

Ensuring timely access to care

Promoting healthy, safe, and drug-free communities Prioritizing accountable and outcome-driven financing Locally managing systems of care

Target groups were identified to participate in the survey; Law enforcement/judicial

Education

Provider executive directors & direct service stuff ADAMHS Bourd stufflexecutive committee Community partners

Advocates

Consumers & family members

The survey was administered in two ways:

Half via an online survey tool Half via discussion groups

Over 160 individuals were surveyed.

Largest survey groups were consumers and families Data Analysis

The ADAMHS internal team analyzed the survey data and identified trends, strengths, and opportunities for improvement.

Those findings were presented to a focus group which included representatives from each of the survey target areas. Additional input was garnered and incorporated into findings.

Results

Strengths:

The Lake County ADAMHS system offers a thorough continuum of services from prevention to transport to the continuum of services.

Collaboration between ADAMHS and community parliners is strong, and helps to facilitate access to services.

Behavioral health has an identifiable presence in the community, and is seen as a key indicator in

Opportunities for improvement.

Resource access/awareness

Too often, consumers, family members, and agency staff are unaware of available relevant services and don't know how to access those services.

Peer involvement

The ADAMHS system needs to develop a more comprehensive plan for providing poer support services, including outroach and mentoring

Other pieces in the "recovery puzzle"

Some areas identified as needing improvement involves services over which ADAMHS has no direct control, these cases it will be important to engage community mathems in labs facilities change.

Transportation issues create challenges for consumers and families

More opportunities to "celebrate recovery"

Better integration of physical & behavioral healthcare More apportunities for consumers/families to

Education.

We're very good at collaboration. We use evidencebased practices. We employ careful, specific process regarding the planning, and funding of services. Not enough records know that.

Action Steps

The Lake ADAMHS management team will create and prioritize immediate, short-term (6-12 months), and longer-term (12-24 months) goals.

Already underway:

Implementation of ADAMHS 100 Culture of ADAMHS intuining assissing of all near employees in the ADAMHS network; providing employees with the knowledge and tools needed to help clients access a fuller array of appropriate services. Integration of physical and behavioral health identified as they component on providers submit proposits for the SFY2016 contract souson. ADAMHS stiff ocumunity partners are working

Bottom line

The Lake County ADAMHS Board is accountable to consumers, families and community. The self-assessment process helps us create a culture of care that meets the unique needs of Lake Countians, and the input of our partners and stakeholders helps further spur our commitment to Recovery County of Section 15 Section 16 Section 15 Section 16

RECOVERY IS BEAUTIFUL BLUEPRINT

The goals and action steps for Beautiful BluePrint have been update for SFY 2017-2019.

The updates include an added emphasis on prevention and wellness, and continued prioritization of the involvement of individuals in recovery with the community. The five principles are as follow:

- Focusing on Clients and Families
- Ensuring Timely Access to Care
- Promoting Healthy, Safe, and Drug-Free Communities
- Prioritizing Accountable and Outcome-Driven Financing
- Locally Managing Mental Health and Addiction Systems of Care
