CSAT Directions moving forward

Anne M. Herron Acting Director Center for Substance Abuse Treatment Substance Abuse and Mental Health Services Administration U.S. Department of Health and Human Services

Onaje has given you a sense of what we are implementing now....

I'd like to give you a taste of what we are looking toward...... what challenges we are trying to address..... what trends we are paying attention to......

- Importance of
 - Coordinated messaging across project officers and centers
 - Clear expectations on information needed
 - Provision of timely answers to questions
 - State to state sharing of strategies and successes

Internal focus:

- Created a single team of Treatment and Prevention project officers to provide support and monitoring
- Team reports to the CSAT Center Director and includes OFR and CBHSQ
- Piloting a CQI approach for consistent communication, expectations for both grantee and project officer involvement and documentation and improved response time for questions.

Challenge of external coordination:

Not including SAMHSA - In 2019, there are 75 current federal grant programs that have a specific focus on opioids

Prevention

Treatment

Integration

Workforce Development

Age focus - Neonatal through geriatric

Epidemiology

Other....

Administration for Children and Families (5)

- AIAN Head Start
- Disaster Assistance
- Evaluating Child Care Reform
- Head Start and Early Head Start
- Transitional Living Program

Administration for Community Living (9)

- Alzheimer's Disease Program Initiative (ADPI)
- Empowering Older Adults and Adults with Disabilities through Chronic Disease Self-Management Education Programs – financed by Prevention and Public Health Funds (PPHF)
- Evidence-Based Falls Prevention Programs Financed Solely by Prevention and Public Health Funds (PPHF)
- Paralysis Resource Center
- Special Programs for the Aging, Title IV, and Title II, Discretionary Projects
- State Health Insurance Assistance Program
- Traumatic Brain Injury State Demonstration Grant Program
- University Centers for Excellence in Developmental Disabilities Education, Research, and Service
- Neonatal Abstinence Syndrome National Training Initiative

AHRQ (6)

- Family-Clinician Partnerships to Improve Child Safety in the Hospital
- Hospital Management of Acute Respiratory Illness in Children with Neurologic Impairment.
- Immediate Postpartum Contraception: Implementing and Evaluating Evidence-based Practice
- Interprofessional Perinatal Consults to Improve Communication Quality, Satisfaction, and Team Cohesion: A Randomized Controlled Trial of the Collaboration for Antepartum Risk Evaluation (CARE) Model
- Predicting Pediatric Readmission: Development of a Validated Risk Prediction Tool
- Prioritizing Quality Improvement for the Treatment of Psychiatric Disturbances Following Traumatic Brain Injury

IHS (4)

- 4 in 1 Urban Indian Health Programs Substance Abuse, Mental Health, Immunizations, HPDP
- Bad River Healthy Lifestyles Project
- Immunization, Alcohol Substance Abuse and Mental Health Project
- Zero Suicide Initiative

CDC (10)

- AIDS/HIV Preventive Activities
- Behavior Risk Factor Surveillance System
- Essentials for Childhood Initiative
- Improving Student Health and Academic Achievement through Nutrition, Physical Activity and the Management of Chronic Conditions in Schools
- National Collaboration to Support Health, Wellness and Academic Success of School-Age Children in Out-of-School Time Settings
- National State Based Comprehensive Tobacco Control Program
- National Training Center for School Health
- NEHA Technical Assistance for the Public Health Emergency Preparedness Initiative
- REAL/T (Reaching, Educating, Assisting and Liberating Transgender)
- Sexual Violence Prevention and Education

HRSA (32)

- Academic Units for Primary Care Training and Enhancement (UH1)
- Alliance for Innovation on Maternal and Child Health (UC4)
- Behavioral Health Workforce Education and Training Program (M01)
- Bright Futures for Women's Health: Standard Practice Guidelines for Well Woman Care (UH0)
- Bright Futures Pediatric Implementation (U04)
- Building Systems of Services for Children and Youth with Special Health Care Needs (U1T)
- Child and Adolescent Injury and Violence Prevention Resource Centers Cooperative Agreement (U49)
- Collaborative Improvement and Innovation Network on School-Based Health Services (U61)
- Community-Based Integrated Service Systems (Local/State) (H25)
- Developmental-Behavioral Pediatrics Training Program (T77)
- Early Childhood Health Promotion System for High Need Program (UK2)
- Evidence-Based Tele-Behavioral Health Network Program (G01)
- Graduate Psychology Education Programs (D40)

HRSA

- Health Center Program (H80)
- Healthy Start Initiative-Eliminating Racial/Ethnic Disparities (H49)
- Healthy Tomorrows Partnership for Children Program (H17)
- High Poverty Rural Chilidren Telehealth Network Grant Program (D3F)
- Home Visiting Collaborative Improvement and Innovation Network (UF4)
- Infant-Toddler Court Program (U2D)
- Leadership Education in Adolescent Health (LEAH) (T71)
- Leadership Education in Neurodevelopmental and Related Disorders Training Program (T73)
- Leadership in Public Health Social Work Education Grant Program (G05)
- Licensure Portability Grant Program (H1M)
- Maternal and Child Health Nutrition Training Program (T79)
- Maternal and Child Health Public Health Training Program (T76)
- Maternal and Child Health Services (B04)
- Maternal, Infant and Early Childhood Homevisiting Grant Program (X10)
- National AIDS Education and Training Centers (H4A)
- National Emergency Medical Services for Children (EMSC) Resource Centers Demonstration CA (U07)
- National Fetal, Infant and Child Death Review Center Program (UG7)
- Rural Health Opioid Program (H1U)
- Telehealth Resource Center Grant Program (G22)

Substance Use Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act

- Affords practitioners greater flexibility in the provision of medicationassisted treatment (MAT)
- Extends the privilege of prescribing buprenorphine in office-based settings to Clinical Nurse Specialists, Certified Registered Nurse Anesthetists, and Certified Nurse Midwives (CNSs, CRNSs, and CNMs)* until October 1, 2023.

Importance of providing administrative support and linkage with specialty providers – working with nursing associations.

Targeted Capacity Expansion (TCE) Grants

The TCE program provides rapid, strategic, comprehensive, and integrated community-based responses to gaps in and capacity for substance abuse treatment and recovery support services.

Targeted Capacity Expansion- Special Projects

The purpose of this program is to develop and implement targeted strategies for substance use disorder treatment provision to address a specific population or area of focus identified by the community. The purpose of the TCE program is to address an unmet need or underserved population; this program aims to enable a community to identify the specific need or population it wishes to address through the provision of evidence-based substance use disorder treatment and/or recovery support services.

- SAMHSA's approach is to move away from prescriptive TA and support the states in the determination of TA needs –
- SABG each state had \$265k in NOA (\$25k for jurisdictions)
- MHBG each state had \$141k in NOA (\$25k for jurisdictions)
- Use of those dollars is at the discretion and determination of each state authority to use in support of your specific needs.
- Can use SAMHSA free TA, purchase your own consultants/experts and support conference/workshop attendance, etc.

FAQ

Opioid Response Network

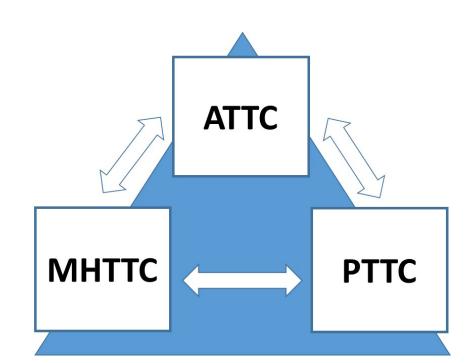

The State Targeted Response Technical Assistance Consortium (STR-TA), a grant funded by the Substance Abuse and Mental Health Services Administration (SAMHSA), was created to provide education and training at a local level to provide evidence-based practices in the prevention, treatment and recovery of opioid use disorders. In response, the American Academy of Addiction Psychiatry and a large

Methamphetamine Use by State

Percentages of People Aged 12 or Older 1.06-1.41

Differences in colors across states does not indicate significant differences in estimates.

- Over the past eight years, there has been a nearly tenfold increase in the amount of methamphetamine seized by US Customs and Border Protection, from 8,900 pounds in 2010 to nearly 82,000 pounds so far in 2018.
- Figures are for fiscal years. 2018 data is from October 1, 2017 through August 31, 2018.
- Source: <u>US Customs and Border Protection</u>
- Overdose deaths involving cocaine and psychostimulants continue to increase. During 2015–2016, age-adjusted cocaine-involved and psychostimulant-involved death rates increased by 52.4% and 33.3%, respectively
- Continued increases in stimulant-involved deaths require expanded surveillance and comprehensive, evidence-based public health and public safety interventions.

SAMHSA exploring the expansion of contingency management approaches.

Substances: Kratom

The effects of kratom in humans are dose-dependent:

- Small doses produce stimulatory effects resembling the stimulant effect of drugs such as cocaine or amphetamines.
- Larger dosages associated with sedative-narcotic, pain reducing effects that resemble drugs such as opiates.
- Regular kratom use is associated with addictive disorders, as evidenced by craving and compulsive use. Opioid withdrawal symptoms upon cessation.
