EXPANDING ACCESS THROUGH HIT

- OTP SCP
- Mobile Apps
- ECHO

Content on this slide is for educational purposes only; there is no explicit nor implicit endorsement of services or products.
Use of a Health Information Exchange (HIE) to facilitate the exchange of dosing and associated demographic information between OTPs during a service interruption or a temporary client relocation, in accordance with client preferences.

- All activities and systems are compliant with 42 CFR Part 2

http://blog.samhsa.gov/2015/11/13/providing-otp-services-during-service-disruptions/#.Vw-eGs8XRPP
MOBILE APPS

Content on this slide is for educational purposes only; there is no explicit nor implicit endorsement of services or products.
OPIOID RECOVERY APP CHALLENGE

Create an Opioid Recovery App for Patients Receiving Treatment!

Create an innovative mobile app to provide opioid recovery support for patients receiving medication-assisted treatment for opioid use disorders.

Are you good at creating user-friendly mobile apps for smartphones? Do you like to make a positive difference in the lives of others and in our nation’s communities? Then we’re looking for you to work on this challenge! Just as there are apps to help people with diabetes manage their disease, people in recovery need assistance too.

45 days to submit
Mar 4 – May 28, 2016

Register for this challenge
