

Previous Exemplary Award Winners: 2003-2017

September 2017

- **Evansville Medication Diversion Prevention Program**—Building A Safer Evansville (BASE), a substance abuse prevention coalition, collaborated with nine key partners/sectors of the community to implement the Evansville Medication Diversion Prevention program. These community partners included the Evansville Police Department, Evansville Fire & EMS, Funeral Homes, the Evansville School District, Realtor’s, Creekside Place (Senior Center), Healthcare Offices, Section 8 Housing and Employers. The program was implemented for all community members residing in the unique service area of BASE, which is the Evansville, WI School District, with a total population of 13,268 persons. Before the Evansville Medication Diversion Prevention program was implemented in the community, there was a significant number of prescription medication overdoses, increased problems in the Evansville School District with prescription medication misuse and abuse and increased thefts of prescription medications from homes in the community. The results of the program are a decrease in 30-day use of prescription medications in middle school and high school students in Evansville as reported by the Youth Risk Behavior Survey (YRBS); an increase in the proper disposal of prescription medication in Evansville as reported by the Evansville, WI Police Department; an increase in proper storage and security of prescription medication in the community of Evansville as reported by BASE; and community members in Evansville no longer identifying prescription medication misuse and abuse as a problem as reported during BASE listening sessions and Focus Groups.
- **OK SPF-PFS Intertribal Consortium Initiative**—The Oklahoma Intertribal Consortium (OIC) is a collaborative substance abuse prevention effort between four federally recognized American Indian Tribes in Central and Southwest Oklahoma and one of the national Tribal Epidemiology Centers (TEC). This initiative seeks to demonstrate that Tribes can successfully work together, under the structured guidance of a Native Managing Entity, to reduce underage drinking and prescription drug abuse and reduce substance abuse disparities among Natives. The OIC Tribal Partners are the Absentee Shawnee Tribe, Cheyenne and Arapaho Tribes, Chickasaw Nation, and the Comanche Nation. Each of the Tribes operates within a multi-county Tribal Jurisdiction and each has Tribal government that has supported the OIC from its creation in 2010. Population within our four Tribal Jurisdictions who are Native alone, or in combination with one or more races, but self-identify as Native totals approximately 102,000 individuals. Our target within that number is the subset of youth and young adults age 12 to 25. We have developed administrative tools to keep our programs on track and in compliance with federal funding guidelines while promoting positive Native social norms. Regarding alcohol and prescription drug misuse, our internal evaluations show both behaviors to have substantially decreased among 343 Native youth tested from

2014 to 2015. Objective measurement of our progress from the Oklahoma Prevention Needs Assessment survey also shows reductions in both these drug categories within our Tribal Jurisdictions. In 2016 among 10th grade Native Students surveyed, all four Tribal Jurisdictions decreased their alcohol use, and two were lower than the state average. Reductions in the nonmedical use of prescription drugs was quite pronounced for two Tribal Jurisdictions. The OIC model of collaboration between Tribes and epidemiologists at the Managing Entity works well and has resulted in positive behavior change about substance use among large numbers of Native youth. The work of the OIC has been recognized by our funding agency, the Substance Abuse and Mental Health Services Administration, and was visited by the US Surgeon General in 2016.

- **Kids Like Us**—Kids Like Us (KLU) is an innovative school and community-based prevention program for an underserved, high-risk population— children whose lives are directly impacted by familial substance abuse. This multiyear, multi-strategy program is offered by the Frederick County Health Department in partnership with Frederick County Public Schools at no cost to families starting when youth are in 4th grade. Selected students participate in a 12-session weekly program led by a KLU counselor and school counselor, and this continues 1-2 times monthly with this same group of students through 8th grade (or through 12th grade for students who are part of the new pilot high school program). Students receive targeted and developmentally informed information, skills and support. During the 2016-17 school year, KLU's community outreach resulted over 1,800 4th graders receiving prevention education and the opportunity for referral into the school-based program, which this year included 189 youth in 35 groups at a total of 24 elementary, middle and high schools. KLU's implementation methods are directly informed by research-based prevention principles including protective factors, social-emotional skills, peer support, early identification and intervention, and arts integration. During the 2014-15 school year, 95% of the counselors believed that KLU helps raise awareness about the negative impact of family substance abuse on students. Furthermore, counselors reported that KLU students seemed happier and more upbeat; appeared less socially isolated and were making new friends; and were opening up to express or address important concerns.

September 2016

- **Greenville County: Enforcing Underage Drinking Laws Coalition, South Carolina**-- In late 2011 to early 2013, the Greenville County (South Carolina) Enforcing Underage Drinking Laws (EUDL) Coalition led community efforts during a National Highway Traffic Safety Administration (NHTSA) demonstration grant. The Coalition worked throughout Greenville County with a primary goal to deny alcohol to individuals under 21 years old utilizing a multi-pronged approach. In previous research, high visibility enforcement campaigns (HVE) are an evidence-based approach that has demonstrated effectiveness in the areas of increased seat belt usage and decreased alcohol-related crashes. The HVE approach combines multiple

waves of strict enforcement with strong media messages occurring at each enforcement wave. Researchers have shown that HVE reduces the issues associated with underage drinking and adult provision of alcohol to youth. The strategic plan developed by the Greenville Coalition for the grant merged source investigation with HVE waves occurring throughout the project period. The primary evaluation conducted by the Coalition focused on using community-specific monthly times-series data measures to compare pre-HVE mean alcohol crash data to post-HVE mean alcohol crash data. Results indicated that crashes for < 21 year olds decreased 11.8% while the control group (21+ year olds) in alcohol crashes increased 19.4% during the project period. The program outcomes suggest the HVE/source investigation approach holds significant promise to reduce the harms of underage drinking in communities.

November 2015

- **MATFORCE: Strategies to Address Prescription Drug Abuse in Yavapai County, Arizona** — MATFORCE, the Yavapai County Substance Abuse Coalition in central Arizona, has been addressing prescription drug abuse since 2010. For the past five years, Coalition and community members implement comprehensive action plans based on the Strategic Prevention Framework (SPF) model and engage hundreds of citizens in the work needed to sustain a multi-systemic approach for addressing prescription drug misuse and abuse. The initiative focuses on five strategies: 1) Reduce access to prescription drugs; 2) Educate prescribers and pharmacists about “Rx drug best practices;” 3) Enhance prescription drug practice and polices in law enforcement; 4) Increase public awareness about the risks of prescription drug misuse; and 5) Build resilience in children and adults. As a result of Coalition efforts, Yavapai County has witnessed substantial decreases in prescription drug problems.
- **Community Culture of Responsible Choices, Missouri** — The Community Culture of Responsible Choices (CCoRC) initiative, implemented from 2006-2015 in Johnson County, Missouri, was designated to reduce underage and high-risk drinking among Air Force Personnel stationed at Whiteman Air Force Base (AFB) in Johnson County, Missouri. The target population for the initiative was the approximately 700 Whiteman AFB personnel aged 18-26 years old. Based on a needs assessment, three primary problem areas were identified: 1) Driving While Intoxicated; 2) Underage Consumption of Alcohol; and 3) High-Risk Drinking. By implementing a modification of the Community Trials Program, the CCoRC Coalition built a strong, multi-agency coalition. Through implementation of enforcement operations, alcohol-free activities, and an innovative, comprehensive education campaign for Whiteman AFB, this project resulted in significant reductions in the three primary problem areas.
- **ICAN Be the Change, Arizona**— Since 2006, ICAN Be the Change has operated grassroots evidence-based prevention programs that have deterred neighborhood kids from involvement in risky behaviors and preventing youth substance abuse in

the City of Chandler, Arizona. In this area, youth and families experience significant poverty and other risk factors, including easy access to drugs and alcohol, high rates of use, exposure to violence and family conflict, low community attachment and commitment to school, and favorable attitudes toward drug and alcohol use/abuse. The initiative focuses on preventing underage drinking, marijuana use, and illegal use of prescription drugs. Evaluation results reveal improvements in critical protective factors; increased participation of adults and family members in prevention activities with their children and communication about underage drinking and substance use risks; decreased alcohol signage in the community; and reduced party citations and alcohol use among 10th graders.

- **Diversion Alert, Maine**—Diversion Alert (DA) is a statewide program in Maine that links prescribers, pharmacists, and law enforcement in their efforts to confront prescription drug abuse. The Diversion Alert Program became a resource for prescribers in the county by increasing awareness of patients abusing or diverting prescriptions so that medical professionals could more effectively respond to and treat patients struggling with addiction; increasing awareness of the magnitude of prescription drug abuse as a means to increase health care providers' readiness to change prescribing behaviors; delivering a resource that is easy to use; increasing access to educational resources about responding to prescription drug abuse and diversion; and developing a strategy to link health care providers and law enforcement in their efforts to tackle prescription drug abuse and diversion. Evaluation results demonstrate significant improvements in health care professionals' communication and collaboration with patients and increased their attentiveness to prescribing practices.

September 2014

- **Students Leading Students**—Student Leadership Services, Inc. (SLS) is a non-profit 501(c) 3 founded in Michigan in 1982 to provide youth-led programs based on youth development theories, drug prevention principles and youth leadership practices in an integrated comprehensive approach. SLS applies these strategies to real life situations. SLS established a network of 620 high schools by 1989. Youth-led groups are trained by SLS to develop and deliver peer education, incorporating health and safety activities in Michigan schools. SLS trains youth to resist alcohol, chemicals, prescription and other drugs, bullying, suicide, unsafe driving, and other issues in youth environments. SLS students challenge the norm and are empowered to influence their peers in the complex world of youth today. Youth also practice leadership, team building, communication, resistance and positive peer influence skills through SLS trainings and local chapter activities that involve schools, parents and communities.

August 2013

- **The Kamiah Community Partners Coalition (KCPC), Indiana** – The KCPC program was established in 2006 when a group of dedicated community members had the foresight to understand the need to extend efforts started by the Safe and Drug Free Schools Program. Using the Strategic Prevention Framework Model, KCPC has implemented sustainable environmental changes by taking a multi-faceted approach. KCPC's mission of "Promoting Positive Change for a Healthy Community" has effected change in the Kamiah School District boundaries by reducing youth marijuana usage by 9%, underage drinking by 3% and increasing perception of harm amongst youth as well as adults. And while they understand that their vision "All Kamiah School District Youth will be substance free" seems insurmountable, they have made great strides in the short time they have been in existence.
- **New Social Engine (NSE), Morris County, New Jersey** - The NSE program originated in 2010 from a Strategic Prevention Framework (SPF) grant received by Prevention Is Key in Morris County, New Jersey provided by NJ's Division of Addiction Services (DAS). Prevention Is Key worked with three local colleges, Fairleigh Dickenson University's College at Florham, the County College of Morris and Drew University, to create a program and generate college student coalitions that would work to reduce the harms of substance use and abuse among the 18-25 population. Nearly 14,000 college students have attended an NSE substance free event since its inception. Strategies include disseminating awareness campaigns (social norming, celebrity quotes, and school guidelines regarding use) and serving on college task forces to advocate for environmental change to implement numerous environmental prevention strategies.

August 2012

- **Individual Prevention Services (IPS), Riverside County, California** – The IPS program was established in 2007 to meet the needs of individuals who are beginning to experience the negative consequences of alcohol and other drug use, but whose use has not yet reached a level of severity to qualify for a diagnosis. Individuals (12 years of age and older) that present for substance use services for the first time at one of Riverside County's seven substance abuse clinics complete a modified Brief Risk Reduction Interview and Intervention Model (BRRIM) screening tool. Depending on the results of their screen, the participant will either work with a prevention specialist to draft an individualized action plan or receive a referral for a diagnostic assessment. Evaluation results demonstrate the project's success in increasing participant's readiness to reduce or quit using harmful substances such as tobacco, alcohol, and marijuana, as well as a readiness to change harmful behaviors related to substance abuse.
- **Parents Empowered, Utah** – Parents Empowered is a Statewide, State-sponsored educational and community mobilization campaign launched in September 2006 to

prevent underage drinking. The campaign uses electronic media and other means of mass communication to provide parents with the knowledge and skills to actively keep their children alcohol-free. Parents Empowered encourages parents to be involved in their children's lives and to set clear rules about not tolerating underage drinking. Parents Empowered is a collaborative effort between State agencies, private companies, and local community coalitions, and is funded through the State's liquor revenue proceeds. Evaluation results show that Parents Empowered achieved measurable decreases in youth binge drinking rates, 30-day use rates, and lifetime use rates among 12th graders. Adults also reported changes in beliefs and behaviors of the harmful effects of underage drinking.

August 2011

- **21 Reasons, a program offered by Medical Care Development of Portland, Maine.** Building on its successes in 2010, 21 Reasons aims to reduce students' alcohol and marijuana use by 5 percentage points by 2015. In order to support drug-free development for young people, the program focuses on key areas that influence youths' environment: parents, law enforcement, access, and community norms.
- **"Be A Jerk", a program offered by City and County of Honolulu, Department of Community Services of Honolulu, Hawaii.** "Be a Jerk" is a grassroots campaign that focuses on community organizing efforts to change the environment that contributes to alcohol use by youth ages 12 to 17. This combined effort of government, private businesses, nonprofits, and community organizations encourages adults to "Be A Jerk" and not buy, serve, or otherwise provide alcohol for minors.
- **The Valley Hi Community Mobilization Project, a program offered by People Reaching Out in Sacramento, California.** VHCMP's mission is to provide skills and opportunities for personal growth by empowering youth and adults to be agents of change in their communities. Evaluation results from previous years demonstrate the project's success in providing youth with caring adult relationships and encouraging youth to see young people as potentially impactful project leaders.

August 2010:

- **Countering Pro-Marijuana Influences a program offered by the North Coastal Prevention Coalition/Vista Community Clinic of Vista, California** - "Countering Pro-Marijuana Influences," developed by the North Coastal Prevention Coalition - is a community-based prevention effort to address marijuana within the cities of Carlsbad, Oceanside, and Vista in San Diego County. Their campaigns have resulted in changing policies to restrict the sale of drug paraphernalia, restricting marijuana dispensaries, reducing pro-drug merchandise at street fairs and outdoor events, and

reducing pro-drug merchandise from national retailers doing business in the community. These campaigns were developed in partnership with San Diego County's HARM Initiative (Health Advocates Rejecting Marijuana).

- **Connect-Immunity Project a program offered by COPEs, Inc., of Louisville, Kentucky** - The Connect-Immunity Project is a 5-year project to determine the effectiveness of our new approach to substance abuse, HIV and Hepatitis prevention with the reentry population and their families. During the first year of the grant, COPEs staff developed a community needs assessment, investigated approaches listed on both the National Registry of Evidence-based Programs and Practices (NREPP) and the Diffusion of Effective Behavioral Interventions (DEBI) project list of model programs, and researched state and local epidemiological data for both substance abuse and HIV infection in order to develop a realistic and practical strategic plan to implement the project. We also formed a Project Advisory Group of formal partners including the Kentucky Department of Corrections, The Volunteers of America of Kentucky, The University of Louisville WINGS Clinic, Dismas Charities and the Louisville Metro Department of Health and Wellness.
- **Inhalant Abuse Prevention Initiative is a program offered by SAFE (Substance Abuse Free Environment), Inc., of Chesterfield, Virginia.** - Did you know that the refrigerant in your air conditioning unit is dangerous? Adolescents who huff it can die suddenly or damage their brains. And it's easy for them to access through the service valve. Loss of refrigerant, even small amounts, can affect the efficiency of your unit and is expensive to replace. Help protect your investment and the safety of our youths. Have your HVAC technician install locking caps on the service valves of your air conditioning unit.

SAFE invited HVAC companies to partner in this initiative, installing locking caps free through the month of April. Several of these companies have agreed to extend this special through May. Dominion Service Company (804-745-0007) will make a free service call to install the locking caps (no parts, labor or service call charge). Hale's Heating and Air Conditioning (804-751-0226), Lin Jarrett Heating and Air Conditioning Co. (804-861-0516), and Woodfin (804-730-5000) will install the locking caps free (no parts or labor charge) during a maintenance or service call. Midlothian Mechanical (804-379-6222) is extending this special through the summer.

- **Medicine Education Program is offered by Behavioral Health Services, Inc., of Gardena, California.** - The Medicine Education Program is accredited by CARF (The Rehabilitation Accreditation Commission). Classes and Training (TAKE CHARGE OF YOUR HEALTH) include a series of four 1-1/2 hour classes offered at senior centers, retirement housing facilities, churches, nutrition sites and other locations where older adults gather. The series is designed to impart information and skills to reduce the risk of alcohol and medication-related problems in adults 55+ throughout the South Bay and Westside areas of Los Angeles County. The four sessions include:
 - Medicines: Friend or Foe: The dangers of medicine misuse

- Using Medicines Wisely: Critical drug information and reading labels
- Take Charge of Your Medicines: Preventing common errors
- Talking To Your Doctor: Making the most of limited time

September 2009:

- **Intent and Motivation: Alcohol Group Exercise (IMAGE)** – This program, from the University of Houston, bridges the gap between prevention practice and research by connecting behavior theory (research) with appropriate prevention approaches (practice). The IMAGE program increases the motivation to change behavior, specifically focusing on decreasing the frequency and quantity of alcohol use and alcohol-related negative consequences, while increasing the use of self-protective behaviors. Three-year trend data have shown a reduction in selected negative consequences and an increase in abstinence rates, especially among underage students.
- **Families Acting Collaboratively to Educate and Involve Teens (FACE IT)** – This program – developed by the School District of Palm Beach County – is a substance abuse prevention and early intervention program for youth aged 12-18 and their parents or caregivers. Youth are referred to the program as an alternative to suspension, or by local law enforcement agencies as a sanction for an arrest related to a youth’s alcohol or other drug incident in the community.
- **Summer Quest** – The intervention consists of a 12-week intensive prevention program for children whose mothers are engaged in long-term addiction treatment. The intervention takes place during the summer months to participants who range in age from 6-14. The children and their families come from economically disadvantaged areas of Columbus. The ATOD prevention groups were positively correlated with positive behaviors.
- **Meridian Mayor’s Anti-Drug Coalition** – This new coalition has embraced the Strategic Prevention Framework by uniting civic leaders, business owners, educators, law enforcement, treatment providers, churches, and residents with consistent messages and policies regarding ATOD use.
- **Wellness Initiative for Senior Education (WISE)** – This intervention focuses specifically on the overuse and misuse of alcohol and prescription medications by older adults. Lessons within the curriculum include nutrition and exercise, medication use, stress management, depression, and substance abuse. Participants were surveyed upon entry, at completion, and 30 days post-completion and demonstrated statistically significant improvements in knowledge, changes in health behavior, and increases in social supports as compared to a control group.

- **Georgia Underage Drinking Prevention Initiative** – This initiative decreases the onset and decreases the prevalence of underage drinking and its related problems. The intervention utilizes environmental approaches to empower and create change in adults and youth by using a framework consisting of (1) statewide, (2) regional, and (3) targeted community levels – each with its own target population and set of goals, objectives and activities. (Working in 10 identified high-risk communities, one of which is “Asian/Pacific Islander” – strong outreach).

August 2008:

- **How to Cope** – How to Cope offers education, support, awareness, and other assistance to individuals who are affected by another person’s abuse of alcohol or drugs. The participants are typically 18 years old or older and program goals include developing an awareness of alcoholism and drug addiction as a family disease and for families to regain balance in their lives. The program focuses on empowering adults impacted by another’s addiction, helping these adults understand the impact on a family unit, and promoting health decisions through education, skills building and a support system.
- **Missouri Partners in Prevention** – is a statewide coalition of twelve public universities serving over 130,000 college students in MO. Building a collaborative and supportive approach, coalition members are dedicated to creating a positive, safe, and healthy learning environment by using a comprehensive approach to implement best practices concerning college drinking. College campuses have experienced a 15% reduction in binge drinking rates since 2001, helping us reach our vision to influence community wide change.
- **PREP: Promoting Responsibility Through Education and Preparation** – is an elementary school program that stems from Discovering Options, the not-for-profit agency providing substance abuse prevention programming for children and youth living in extremely impoverished areas of the City of St. Louis, Missouri. PREP provides a different and healthier way of looking at the world through their after-school and mentoring services offered to African-American children in the 4th and 5th grade. After completing the 10-week program, children are matched with trained mentors who meet one-on-one for an additional twenty weeks.
- **Tehama County Mentoring Program** – is an integrated, comprehensive, school and community-based program addressing the mentoring needs of children ages 5-18 with particular emphasis on the 8-14 years of age range. It brings together more than twenty agencies to serve up to 140 children per year with a one-on-one mentoring relationship. The matched pairs meet on the school campus at least once a week during the student’s lunch period; a majority of these relationships have continued beyond one school year and most have some involvement over the summer.

- **Operation Aware** – engages a curriculum consisting of eight, 40-55 minute, age-appropriate lessons scheduled in the classroom environment once a week for eight weeks. The curriculum includes: goal setting, developing health relationships, problem solving, being self confident, bullying prevention, resisting peer pressure, refusal skills, and substance abuse prevention. Operation Aware operates from the non-profit organization Operation Aware of Oklahoma, and has been providing prevention education in Tulsa and surrounding counties since 1979.
- **Student 2 Student Peer Mentor Programs (S2S)** – is an effort to help teens make positive connections at school and provide students with a non-threatening way to receive positive peer support. The Council on Alcohol and Drugs in Houston developed and began the implementing Student 2 Student program in Houston area schools in 2001. Student 2 Student trains high school students who are willing to take on a leadership role to market the program, facilitate discussion groups, provide one-on-one mentoring, deliver alcohol, tobacco, and other drug presentations, conduct health fairs, and refer students to community resources.

September 2007:

- **Genesee County Drug-Free Communities Coalition** has a membership of 80 organizations and 125 members, and is located in a small rural county of 60,000 residents located between the cities of Buffalo and Rochester in upstate New York. The coalition's mission is to create a community where all youth can develop into caring, healthy, productive adults.
- **Butte County Youth Nexus** was developed and implemented in response to the growing awareness of young people's involvement in alcohol and drug use – including awareness that it is critical to create alcohol-free and drug-free environments and to make important community decisions. Youth Nexus implements a comprehensive Strategic Prevention Framework approach that includes local data collection, needs assessment, capacity building, and involvement with key partners and stakeholders.
- **21 Proof** is a locally developed, innovative responsible beverage service training program for employees of bars, restaurants, and package stores in the city of Cambridge. The program was developed as a collaboration between the Cambridge Prevention Coalition, the Cambridge license Commission, and the Cambridge License Advisory Board. Employee trainings are designed to produce a consistent responsible beverage service among all servers and sellers of alcohol in the community in order to reduce underage commercial access to alcohol products. With approximately 250 liquor licenses in the city of Cambridge, 21 Proof ensures

that retail establishments have the tools and skills necessary to identify minors attempting to purchase alcohol.

- **Downtown Aurora Visual Arts** program serves as a drop-in facility for youth interested in the visual, electronic, or theater arts. Serving an economically-disadvantaged portion of Aurora in the Denver metropolitan area, the program serves up to 800 youth a year. Elementary and middle school youth can participate in the drop-in studio or other art projects; older students can become “junior staff” where they work with the younger students.

August 2006:

- **Youth Action Research for Prevention (YARP)**, aims to decrease and delay the incidence of alcohol and drug use and associated risks as well as to increase positive peer norms among urban adolescents of diverse ethnic backgrounds, residing in neighborhoods with high levels of poverty, drug sales, drug use, violence, poor schools, sex risk, and other stressors, through the conduct of youth-led, adult-supported community based participatory action research for risk prevention. YARP enhances cognitive development and personal growth through youths’ eco-critical exploration of issues that affect their lives; develop positive peer norms relative to risk, and reinforces these norms through community change efforts with other peers and adults.
- **The ABCs of Secondhand Smoke** Each day thousands of parents entrust the care of their children to childcare providers. If parents happen to qualify for federal low-income status, or have a disabled child, it is very likely that the childcare choice the family would make would be Head Start. If these families resided in Southwest Missouri, specifically Douglas, Howell, Shannon, Texas or Wright counties, they and their children would likely have participated in Community Partnership’s “ABCs of Secondhand Smoke” program.

August 2005:

- **Girl Power Program** - Girl Power is a 32-week substance abuse prevention and mental health promotion program for girls 9 – 15 years old. The program teaches a strong “no use” message about alcohol, tobacco, and other drugs while providing opportunities for girls to build skills and self-confidence in academics, arts, sports and other endeavors. It was created in 1998 by the Prevention Unit of the Fairfax-Falls Church Community Services Board, based on the national HHS information campaign.
- **Alternative Classroom Experience (ACE)** - The Alternative Classroom Experience (ACE) is a 30-day residential, educational, and wilderness experience for third,

fourth, and fifth graders who are not achieving their potential in the regular classroom setting. Besides academics, campers learn problem solving skills, crisis management skills, and acceptance of personal responsibility through a variety of outdoor, environmental, and team-building activities. Other components of the program are awareness programming for campers and parents in the areas of gangs, violence/anger, alcohol, tobacco, and other drug use, and AIDS; a transition period back to their regular classroom; and long-term follow up through the completion of 7th grade. In addition, the camp collaborates with other campers who continue to do well in school to provide them with a free scholarship for summer camp. ACE graduates are expected to show academic, behavioral, and/or self-esteem improvements.

- **Boyd and Greenup Champions for a Drug-Free Kentucky** - The Boyd and Greenup Champions for a Drug Free Kentucky, a Drug Free Communities Support Grantee, is a youth alcohol, tobacco, and other drug (ATOD) use/abuse prevention coalition coordinated by ALERT Regional Prevention Center serving Boyd and Greenup County in eastern Kentucky for over 15 years. The coalition implements a comprehensive substance abuse prevention strategy aimed at delaying the onset of use and to decrease current ATOD use. The coalition facilitates curricula implementation in six public school districts, reaching approximately 4,000 students. The primary curriculum utilized is Project Northland, implemented in the 6th, 7th and 8th grades. As students' evaluation data demonstrated outcomes, schools have sought additional research-based curriculum to implement across grade levels reaching more students in their efforts to prevent youth substance use.
- **Butte County Friday Night Live/Club Live Butte County Friday Night Live Mentoring** - For the past 15 years DBH has provided many successful prevention programs including Friday Night Live (FNL) and Club Live (CL). The Butte County Friday Night Live Partnership currently has 7 FNL Chapters on high schools campuses and 6 CL Chapters on junior high school campuses. FNL programs were initiated in response to the growing awareness of young people's involvement in alcohol and drug use as well as awareness that it is critical to create environments for youth by youth that are alcohol and drug free. In addition to the national and state wide data, DBH-Prevention Unit's local data collection findings provides evidence that young people in Butte county are growing up in an environment saturated with messages about alcohol, tobacco, and other drugs and are readily able to access these substances.
- **Building Assets – Reducing Risks** - The Building Assets—Reducing Risks Program is the first school-based program that integrates the developmental assets framework and the risk and protective factor theory. The program is a comprehensive approach to address a wide range of concerns for students in their first year of high school. The purpose of the program is to decrease alcohol, tobacco and other drug use, reduce academic failure, reduce truancy rates, and decrease disciplinary incidents among 9th graders. The program uses an asset-building

approach to strengthen relationships, increase student engagement in school and learning, and identify and intervene with students who are not engaged in school and are at high risk. This approach builds a foundation of protective factors for all students while addressing specific risk factors of students who are most vulnerable.

August 2004:

- **Aroostook Teen Leadership Camp** - The Aroostook Teen Leadership Camp, a county-wide leadership development and drug prevention program, develops adolescent leaders who encourage Aroostook County teens in grades 6-9 to be drug-free through a residential summer camp and follow-up activities during the school year.
- **A Company of Girls** - The Youth Resiliency Project is committed to focusing on the strengths of youth, families and their communities. We believe youth are naturally strong and rich with leadership, honesty, creativity, courage, insight, and determination. We acknowledge that a host of factors create barriers to self-determination for all individuals – and we strive to help people face and overcome these barriers. We also believe the surest way to help youth and families survive and thrive in the face of these challenges is by helping them turn their strengths into action and advocacy.
YRP's mission, "To create opportunities for youth to discover their resiliency, develop skills and take meaningful action in their lives and communities" is being accomplished through six programs areas: A Company of Girls, Maine Youth Action Network, Neighborhoods For Youth, Open Door Community Arts, Peer Leader Program, and Support For Champs
- **CETPA Latino Youth After School Substance Abuse Prevention Program** CETPA provides prevention efforts targeted to Latino youth whose risk of developing substance abuse or other dangerous behaviors is significantly higher than others by virtue of belonging to that subgroup. We accomplish this through community workshops, educational fairs and dissemination of information.

CETPA provides prevention efforts through after-school programs targeted to Latino youth. We provide gender-appropriate programs: ¡Soy Unica, Soy Latina! for girls and ¡Niño Sano, Hombre Fuerte! for boys. Our programs deliver our own bilingual curriculum in combination with The Mendez Foundation curriculum "Too Good For Drugs and Violence". In addition we teach alternative activities such as dance, music and soccer. We also provide prevention summer camps providing healthy alternatives for Latino youth and their families.

- **Alcohol Enforcement Teams** - Our Alcohol Enforcement Team (AET) is a specialized group of law enforcement officers dedicated to enforcing underage drinking laws. The AET incorporates specialized training and strategies to focus on

reducing access and use of alcohol by underage persons. The strategies include any or all of the following: compliance checks, casual contacts, party patrols and controlled party dispersal, traffic safety checkpoints and enforcement, on-premises or bar checks and shoulder taps. The team may perform a single strategy or multiple strategies during the course of a shift. The AET serves all areas of Lexington and Richland Counties.

- **Rio Grande Safe Communities Coalition** - To promote health and safety and to reduce substance abuse, which enhances the quality of life for youth and adults living in the Paso del Norte Region of the Rio Grande.

GOALS

1. To collect, analyze and prioritize injury/illness/fatality data related to traffic crashes and substance abuse
2. To develop a comprehensive regional plan to address education/prevention, intervention, treatment and enforcement
3. To serve as the catalyst, to standardize health and safety public policies, and to change social norms within the three jurisdictions
4. To facilitate and coordinate the implementation of regional programs
5. To evaluate the effectiveness of the Coalition's initiatives

MEMBERSHIP

The coalition is open to all individuals, agencies and organizations interested in improving the quality of life for all who live, work or play in this tri-state region.

August 2003:

- **Bay Area Regional Youth Councils** The Youth Leadership Institute coordinates three countrywide Prevention Youth Councils in the San Francisco Bay Area, which have a two-pronged approach – environmental prevention and youth development – to prevent youth access to and use of alcohol, tobacco and illegal drugs.
- **Connecting To Courage** Connecting to Courage, an adaptation of Project Venture, is a school-based program, which primarily serves Hispanic students and their families. The program focuses on experiential and adventure-based activities, youth driven community services, and highlights positive values and cultural norms customary in the community.
- **Drugs Don't Work In Georgia** The Drugs Don't Work In Georgia program works in conjunction with the Georgia Department of Human resources, the Georgia State Board of Worker's Compensation, the Georgia Chamber of Commerce and local chambers of commerce. The program, designed to respond to the unique needs of the business community, assists business in developing comprehensive, drug-free workplace programs, supplies free and discounted drug-free workplace services

and educates parents on how to talk with their children about the harmful effects of drugs and alcohol.

- **First Born Program** The First Born Program has engaged in selected interventions with young families and their babies since 1997. The core of the First Born Program is that a substance-free and smoke-free pregnancy and infancy are critical to the immediate well being of the mother and child as well as long-term health and success of the family and community.
- **High School Saturday Family Workshop** The High School Saturday Family Workshop is one of many program and services of the Safe and Drug-Free Schools Consortium, established in 1987 to assist all 16 public school districts in the country to establish safe and drug-free schools. The program was created to educate parents in working with schools to address their child's behavior.
- **Rocking Horse Circle Of Support Program** The Rocking Horse Circle of Support is a community-based psycho-educational support group. The program, designed for low-income pregnant and parenting women in rural areas, delivers individual level prevention approaches to decrease the vulnerability to substance abusing behaviors and increase individual capacity for interrupting these behaviors.
- **SAFE (The School & Family Effort)** Since 1995, the SAFE Initiative has impacted the pro-social skill development of middle school students in the DeKalb County School System. Using the Social Development Model, this initiative was developed by the Prevention and Intervention Department of the DeKalb County School System and funded by the Region Two Board and Title V – Safe and Drug-Free Schools and Communities.
- **San Diego County Screening, Brief Intervention and Referral Services** San Diego County's Screening, Brief Intervention and Referral program is a substance abuse prevention program model designed to reduce personal and community problems by helping individuals understand the impact alcohol, drug, tobacco and medication use and abuse may have on one's health and quality of life.
- **Strengthening Families Program** The Strengthening Families Program, modeled after the Iowa State University program, was developed for children and family members of methadone clinics, primarily Detroit inner-city residents, who are in treatment at Nardin Park Recovery Center for opiate addiction.
- **Talking Talons Youth Leadership Curriculum** Talking Talons Youth Leadership takes a unique and highly innovative approach to substance abuse prevention by offering a school-based program to motivate and reconnect youth with the natural wonders of the world. The program to motivate and reconnect youth with the natural wonders of the world.
