Meet the Member

Bobbie Boyer, Prevention Coordinator for State of Ohio
Bobbie Boyer's experience spans more than four decades with work in administration, strategic planning, program development, staff supervision and training, marketing, and community collaboration. In her role as Deputy Director of the Office of Prevention Services, Ms. Boyer is responsible for managing the department's overall prevention efforts. This includes making sure that programming is aligned with priorities established by the Governor's RecoveryOhio initiative and expanding the workforce that is capable of sustaining evidence-based prevention strategies. The Office of Prevention Services provides infrastructure support to local communities and organizations in their work to reduce risk and implement strategies that promote mental and emotional health. Ms. Boyer holds independent licensure from the Ohio Counselor and Social Worker Board and the Ohio Chemical Dependency Professionals Board, along with the highest certification in prevention.

News from NASADAD

AMCHP and NASADAD release case studies on harm reduction strategies for PPW

The Association of Maternal and Child Health Programs (AMCHP), in collaboration with NASADAD, recently released an interactive collection of case studies on State harm reduction strategies. The resource was developed to highlight successful collaborations between State Maternal and Child Health (MCH) Title V programs and State alcohol and drug use agencies, identify examples of evidence-based harm reduction practices at the State and local level, and share key takeaways of these practices. State profiles were developed for Alabama, Colorado, Connecticut, Florida, Iowa, Nevada, New Jersey, Pennsylvania, Rhode Island, and Vermont and harm reduction services included contraceptive counseling; care-quality collaboratives; Screening, Brief Intervention, and Referral to Treatment (SBIRT); naloxone distribution; medication-assisted treatment (MAT); and syringe service programs.

Around the Agencies

SAMHSA accepting applications for new Harm Reduction Grant Program

The Substance Abuse and Mental Health Services Administration (SAMHSA) is now accepting applications for the new SAMHSA Harm Reduction Grant Program. As described in the funding announcement, this funding, which was authorized by the American Rescue Plan Act (ARPA), will help increase access to a range of community harm reduction services and support harm reduction service providers as they work to help prevent overdose deaths and reduce the health risks often associated with substance use. A webinar to review the requirements of the grant program will be held on December 20th at 2:00pm. Registration is not required and the webinar can be accessed here.

SAMHSA releases publication on buprenorphine in primary care settings

The Substance Abuse and Mental Health Services Administration recently released a new publication titled Practical Tools for Prescribing and Promoting Buprenorphine in Primary Care Settings. As described in the publication, the resource provides information to primary care providers and practices on how to implement opioid use disorder treatment using buprenorphine and identifies
The Substance Abuse and Mental Health Services Administration (SAMHSA) recently released a 988 Appropriations Report. As directed by Congress in the fiscal year (FY) 2021 Labor, Health and Human Services, Education, and Related Agencies (L-HHS) appropriations bill, SAMHSA prepared the report responding to congressional questions regarding the National Suicide Prevention Lifeline and 988 implementation. The report notes the potential for 988 to transform the crisis system and discusses volume and cost estimates needed for full 988 implementation. SAMHSA noted that efforts are currently focused on strengthening and expanding the existing Lifeline network with a total of $282 million to accomplish this. Approximately $177 million will be used to strengthen and expand Lifeline network operations, telephone infrastructure, and expansion of chat/text response services. An addition $105 million will be used to fund States and territories to build up their workforce in local crisis call centers. In addition to funding allocations, SAMHSA included data on suicide rates and attempts, Lifeline call and text volume data, and training efforts to improve services for at-risk youth.

Research Roundup

The National Institute on Drug Abuse (NIDA) recently released findings from the 2021 Monitoring the Future survey which gathers data regarding substance use behaviors and attitudes among eighth, 10th, and 12th graders. Results of the survey indicated that the percentage of adolescents reporting substance use decreased significantly in 2021, including those most commonly used – alcohol, marijuana, and vaped nicotine. This year, the study also surveyed adolescents on mental health during the COVID-19 pandemic and found that students across all age-groups reported moderate increases in feelings of boredom, anxiety, depression, loneliness, worry, difficulty sleeping, and other negative mental health indicators since the beginning of the pandemic.
